Backyard Bird Tours and Programs

Our backyard bird programs in the month of October will feature topics related to seasonal changes such as migration and feeding birds in the colder seasons. Join us for weekly bird programs which include tips for identifying birds, becoming aware of the birds around you, and building home backyard habitat. We also offer family backpack tours of the garden when our avian educator is present to guide you.

Harvest Garden Tasting

The harvest gardens offer a colorful bounty of tastes and smells—and good nutrition too! Join us for tasting and learning about the edible plants growing in our garden each Wednesday morning. This month we are enjoying a harvest of apples, sweet potatoes, and many varieties of winter squash.

The above activities and programs represent the regularly scheduled learning opportunities in the garden. Every weekday morning from 10:00 a.m. to 12:00 p.m. you are welcome to visit the garden and be surprised by the engaging materials and experiences offered for children of all ages. Our natural setting has so much to offer for children of all ages and for the young-at-heart.

October will be the last month of the year when we will offer weekday activities with garden guides present. The garden is still a beautiful place to visit throughout the year and we encourage you to dress for the weather and come out to the garden year round. It is the best way to see the seasonal changes in nature.

Please come out to enjoy our fall and winter displays including the winter tree in the glass house with decorations made by local children!
