Volunteer applications are available in four convenient periods during the season:

- April 30
- May 28
- June 25
- July 30

To sign up, attend our annual volunteer information walk Saturdays from 9:30 am to 11:00 am (except for April 30 when the walk is held at 11:00 am) or become a volunteer online at our website. After becoming a volunteer, attend the morning information walks on Saturdays in April, May, and June. From building a trail to planting daffodils, the gardens always surprises and amazes us. We look forward to seeing what else will emerge from the gardens to spark our curiosity and create new learning opportunities throughout the season.

We encourage you to use Plant Finder, a feature of our website, to identify individual plants and to learn about their characteristics and needs. Plant Finder is searchable by plant name, scientific name, genus, family, or characteristic. It is an interactive tool that features detailed information on plant growth and care, including propagation methods, pest and disease control, and more.

Volunteer activities for the 2019 season are designed to engage visitors of all ages and abilities. Work with our summer staff to plant new areas of the gardens, develop and maintain plant collections, and promote environmental stewardship and education.
